

<http://WWW.ISLEOFPODS.COM>

£100/hr self-funded podcast rate includes:

 Armchair & Sofa setup:

 2 cameras (Host and guests):

🎙️ up to 3 “*Shure SM7dB*” **podcast mics**:

💡 Soft natural or bright TV-style **lighting** (your choice)

🔧 On-site engineer

☕ Nespresso, tea, water & biscuits

💾 File transfer to your SSD. After your session you'll receive the **raw, unedited** materials:

1. Footage from **Camera A**
2. Footage from **Camera B**
3. A **mixed audio track** and **separate audio files** from each podcast mic
4. Footage from **Camera C** will be provided if you opt in for the wide-angle add-on.

Please allow **15 minutes within your booked time** for us to transfer your files at the end of your session.

Optional Add-Ons & Extras

Furniture setup and kit reconfiguration		Default setup includes a sofa and armchairs. If you'd like to use a different setup (e.g. x2 armchairs), there is an additional fee. This covers the time it takes us to rearrange furniture and reconfigure the kit before and after your session. You won't need to do anything, we'll have everything ready before you arrive and reset it once you leave.	£100 per session
Clip-on mic		Available for a more TV-style interview look (instead of podcast-style).	£35 per mic per session
Camera C		Wide-angle shot showing both host and guest together in the same frame.	£100 per session
Teleprompter		Perfect for recording your intro and outro. DIY operation required. We'll provide a teleprompter mount and remote. To save time on set, we recommend bringing your own iPad with the free Neewer app already installed. No iPad? No problem - we can provide one at no extra cost. Still, we suggest downloading the Neewer app on your phone beforehand to get familiar with how it works.	£120 per session
Purchase an SSD from us		"Crucial X10 Pro 1TB", ideal if you plan to edit yourself but forgot to bring your own SSD.	£150
Same-day WeTransfer		Same-day upload right after your session – perfect if you need to send the download link to your editor.	£50
Videography services		An engineer is included to manage all technical requirements. Should your project require videography services, please contact us for a tailored quote.	Contact us for a custom quote
Simple podcast editing		This includes transcription, editing, two rounds of revisions, colour correction, and sound mixing. You are, of course, welcome to use your own editor or manage the editing independently.	£300 per episode

Intro Discount + Free Teleprompter

New to podcasting and funding it yourself? Our Intro Package is tailored for independent podcasters without brand or sponsorship support - a complete launch setup for just **£499**.
